

April 28, 2019

Dear Patient,

Providing safer, all-natural alternatives to conventional pharmaceuticals has always been our primary goal as was helping a young boy named Michael, who was diagnosed with autism and losing a little part of himself each day. As many parents did at the time, Michael's parents succumbed to conventional medicine to treat his condition. They were desperate to improve the quality of his life. But just the opposite happened as the drug's side effects wreaked havoc on his body, robbing him of his overall well being.

Our plight to help children like Michael helped set the stage for future developments as we later worked with a formidable medical team to formulate cardio-vascular products. This was the genesis of Vascore Natural. Now over 20 years later, we're happy to say that Michael has graduated high school and thriving as a healthy 21-year-old. And we owe that all to a talented and knowledgeable medical team who has worked hard to help develop the purist, most effective pharmaceutical alternatives without the harmful additives or resulting side effects. These products consisted of Super Omega 3, derived from fish oil; our energy-boosting Cellular Energy Support; our cardiovascular powerhouse, Coenzyme 10; and our immunity-supportive Vitamin D. The team who has more than 60 years of combined pharmaceutical experience discovered a way to make a profound change in the health of others like you who have tried our products. Using plant-based ingredients high in antioxidants and anti-inflammatory properties, we have been successful in changing the face of medicine one nutrient at a time...and at a lower cost.

Now we're asking you to take the leap of faith again. As you know, in an effort to grow and help more customers we encountered a major setback several months ago. But our commitment to sharing our viable nutrients has continued to push us forward, and we're happy to report that we're back on track and ready to grow again. We are joining forces with an established leader in the field known as Central Compounding Center in Farmingdale, NJ. This new partnership will enable us to not only restart our

business but also continue to make our products locally in New Jersey.

But we need your help, and in turn we will help you stay healthy. Rest assured, our products haven't changed nor has our guarantee that they are formulated with the very best, cardiovascular-friendly nutrients that will bolster your health and improve the quality of life for you and your family. We also invite you to stop into the Compounding Center pharmacy at 1306 Route 33, Unit 4 in Farmingdale, NJ, for a free consultation. We look forward to welcoming you back!

Sincerely,

Vascore Natural
